Figure 1: Examples of map symbols and their corresponding labels. The figure is organized into three columns. The first column shows symbols for 'Highway' (a solid line), 'Secondary Road' (a dashed line), 'Imp. Road/Walkway/Ferry' (a line with cross-ticks), and 'Railroad' (a line with cross-ticks and a central bar). The second column shows symbols for 'Pipe/Power Line' (a line with small circles), 'Ridge/Physical Feature' (a line with small triangles), 'Property/Fence Line' (a line with small squares), and 'Nonvisible Boundary' (a dashed line). The third column shows symbols for 'Stream/Shoreline' (a blue line with wavy patterns), 'Intermittent Stream' (a blue line with wavy patterns and a dashed center), 'River / Lake' (a blue line with wavy patterns and a dashed center), and 'Glacier' (a blue line with wavy patterns and a dashed center). Below these columns are three boxes: 'Modality' (a blue box with white dots), 'Inset' (a grey box with a white border), and 'Out Area' (a white box with a grey border).

¹ A '*' following a place name indicates that the place is coextensive with a MCD; A '°' indicates that the place is also a false MCD; the false MCD name is not shown.

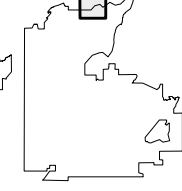

* This map shows tribal census tract boundaries and numbers within the subject entity; nontribal census tract boundaries are shown outside of the subject entity without numbers. A tribal census tract is a type of census tract defined by the American Indian or Alaska Native reservation or off-reservation trust lands for the purpose of providing data based on an American Indian hierarchy rather than by state and county. Where reservation or off-reservation trust lands cross state or county boundaries, the same tribal census tract number may be assigned on both sides of the boundary, and, if so, constitutes a single tribal census tract entity.

³ A * * * following a block number indicates that the block number is repeated elsewhere in the block.
